

**Objective**

In this challenge, we learn about conditional statements. Check out the [Tutorial](#) tab for learning materials and an instructional video.

**Task**

Given an integer,  $n$ , perform the following conditional actions:

- If  $n$  is odd, print `Weird`
- If  $n$  is even and in the inclusive range of 2 to 5, print `Not Weird`
- If  $n$  is even and in the inclusive range of 6 to 20, print `Weird`
- If  $n$  is even and greater than 20, print `Not Weird`

Complete the stub code provided in your editor to print whether or not  $n$  is weird.

**Input Format**

A single line containing a positive integer,  $n$ .

**Constraints**

- $1 \leq n \leq 100$

**Output Format**

Print `Weird` if the number is weird; otherwise, print `Not Weird`.

**Sample Input 0**

```
3
```

**Sample Output 0**

```
Weird
```

**Sample Input 1**

```
24
```

**Sample Output 1**

```
Not Weird
```

**Explanation**

Sample Case 0:  $n = 3$

$n$  is odd and odd numbers are weird, so we print `Weird`.

Sample Case 1:  $n = 24$

$n > 20$  and  $n$  is even, so it is not weird. Thus, we print `Not Weird`.
